

# CHEMISTRY IN THE PHARMACEUTICAL INDUSTRY SYMPOSIUM

Join us for an afternoon celebrating chemistry in the pharmaceutical sciences. This mini-symposium brings together speakers from both academia and industry to provide an exciting line up describing some recent advances in the field.

1:00 - 1:40 pm	<b>Leveraging Industrial/Academic Collaborations to Increase Access of New 3-Dimensional Architectures</b> <i>James Mousseau</i> Pfizer Inc.
1:40 - 2:20 pm	<b>Scaling Photoredox Catalysis in Flow</b> <i>Kaid Harper</i> AbbVie Inc.
2:20 - 3:00 pm	<b>Designing PDGFR inhibitors for duration of action after inhaled delivery</b> <i>Duncan Shaw</i> Novartis Institutes for Biomedical Research
3:00 - 3:20 pm	<b>Coffee Break</b>
3:20 - 4:00 pm	<b>Radical Conjugate addition of alkyl bromides to <math>\alpha,\beta</math>-unsaturated amides and esters via photoredox catalysis</b> <i>Jaume Balsells-padros</i> Merck & Co., Inc.
4:00 - 4:40 pm	<b>Catalytic Site- and Enantioselective Electrophilic Aromatic Substitutions</b> <i>Scott Miller</i> Yale University
4:40 - 6:30 pm	<b>Poster Session with refreshments</b>

WEDNESDAY JANUARY 10<sup>TH</sup>
